TYSON WILLEY

WEB DEVELOPER

PROFILE

A web developer in the Orlando area, I specialize in ColdFusion, PHP, Flash, ActionScript, Javascript (most commonly of the jQuery persuasion), MySQL, and clean, standard compliant, semantic XHTML and CSS. Though I consider myself a developer first, I take pride in my ability to wear many hats and strive to be as well-rounded a web guy as I can.

Personally, I'm a dad, husband, sports nerd and fledgling guitar player.

RECENT WORK

sabalpalmlearningacademy.com

Custom designed and developed using PHP and the CodeIgniter framework. Includes custom designed, illustrations.

daytontechtown.com

Developed in PHP adhering to MVC practices and using CodeIgniter. Includes custom Google Maps / jQuery widget.

piecouncil.org

Features a member maintained recipe bank and a custom CMS developed with ColdFusion & MySQL.
